DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 7, 11, and 12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1, 7, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morris Weiss US 3371212 A (Weiss) in view of Fischer et al. US 6,091,529 (Fischer).

Weiss disclosed a transceiver with a receiving reflecting surface for reflecting the received signal said receiving surface comprising an outer edge and an output aperture for outputting the light said aperture extending outside and along the outer edge of the receiving surface.

Weiss does not disclosed transmitting or receiving coherent light.

Fischer disclosed using coherent light. It would have been obvious to one of ordinary skill in the art at the time of invention to use coherent light in the Schairer invention for the advantage of keeping the optical frequency used for transmission freely selectable within a wide range, as disclosed by

Fischer (Col. 2, lines 50-60).

Allowable Subject Matter

4. Claim 2-6, and 8 - 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
